

STIR VEN

TECHNICAL FILE

FRANÇOIS VIVIER – ARCHITECTE NAVAL

Being the winner of the contest of plans “a boat to go to the islands” organised by Chasse- Marée, in the category of “tradition revisited”, Stir-Ven unites classicism and modernity. It gets from classicism, the elegance of its clincher-built hull, the conviviality of its long and deep cockpit, aesthetics of a leg-of-mutton rig with high performance at all speeds (jib rig), beauty of varnished wood, bronze deck fittings, manoeuvrability by scull, possibility of rowing in non-windy weathers (oars are placed under the lateral decks). It gets from the modernity, the clincher-built plywood epoxy technology, the reduced maintenance requirements, the ease of towing and putting into water, the light-weight keel that allows the use of a 180 kg. Centreboard-ballast made of moulded profile, and the security (unsinkability). Stir Ven is intended for daily cruises, solitary or with crew; it is also suitable for sea cruises: it has two beds in its small cabin, two others on the cockpit floor under a tent which even allows you to stand up! You can live a few days on board freely, having access to most moorings forbidden to larger cruisers.

L.O.A	6.70 m
L.W.L.	5.80 m
BEAM	2.20 m
DRAFT CB UP	0,25 m
DRAFT CB DOWN	1.14 m
WEIGHT	800 kg
CENTERBOARD	180 kg
SAIL AREA	26 m2
CAPACITY	7 PERSONS
PRODUCTION	CLINKER MARINE PW
KATEGORİ	C

A complete kit consisting of all plywood parts cut with digital CNC machines, most of which are real-size, and the templates necessary for construction, is already available. Finally, we also supply a complete file for amateur boat builders, which contain an illustrated guide and 27 plans in A3 format. Today, 25 Stir Vens have been built, nearly half of them by amateur boat builders. Stir Vens will finally be able to race together on occasions like Golfe Week, races of Bois de la Chaise etc... The series is under continuous development. Please note that the Stir Ven construction file is available in English.
